## AIMWA 009

# VINEYARD

### TERM III-

### SCIENCE

#### STD 6

1.	Which of the following juices ends the digestion of		
	food in the gut?	no parecial disease and	

- A. Gastric juice
- B. Intestinal juice
- C. Saliva
- D. Bile juice
- 2. Which part of the male reproductive system are sperms produced?
  - A. Epididymis
- B. Urethra
- C. Sperm duct
- D. Testis
- 3. When breathing out the
  - A. ribs move upwards and outwards
  - B. diaphragm become dome shaped
  - C. lungs expand
  - D. ribs move down and outwards
- 4. Ovulation in females takes place in the
  - A. ovary
- B. oviduct
- C. uterus
- D. vagina
- 5. Which of the following plant is green and no-flowering?
  - A. Mould
- B. Moss
- C. Acacia
- D. Puffball
- 6. The tooth shown below is mainly used for:-

- A. Tearing food
- B. Bitting and cutting food
- C. Tearing and chewing food
- D. Crushing and grinding food
- 7. The following are characteristics of animals:-
  - (i) Body covered with scales
  - (ii) Lay eggs
  - (iii) Body temperature changes with surrounding
  - (iv) Breath by lungs

- Which animal listed below does <u>not</u> have all the features above?
- A. Eagle

- B. Lizard
- C. Crocodile
- D. Gecko
- 8. Which of the following is <u>not</u> a function of roots in plants?
  - A. Storing food
  - B. Making food
  - C. Breathing
  - D. Absorption
- 9. Which of the following diseases is not communicable?
  - A. Malaria
  - B. Measles
  - C. Tetanus
  - D. Tuberculosis
- 10. A baby is given a BCG vaccine at birth to prevent from controlling?
  - A. Diptheria
  - B. Tuberculosis
  - C. Measles
  - D. Polio
- 11. The diagram below shows a process which take place in plants.

  DROPLETS

  CLEAR POLYTHENE BAS

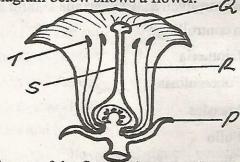

The process shown above is called

- A. transpiration
- B. transportation
- C. photosynthesis
- D. absorption

- 12. Which of the following is the first stage of HIV infection?
  - A. Incubation
  - B. Assymptomatic
  - C. Window
  - D. Full-blown
- 13. The set-up below was made by class four pupils to investigate a component of soil. Which component were they investigating

- B. Air
- C. Humus
- D. Living things
- 14. Which of the following factors does not affect floating and sinking?
  - A. Shape
- B. Size
- C. Mass
- D. Material
- 15. The diagram below shows a flower.

Which part of the flower above produces the male reproductive cells?

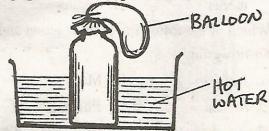

A. S

B. R

C. T

- D. Q
- 16. The main function of part labelled P is:-
  - A. produce female cells
  - B. attract insects for pollination
  - C. contain the plain grains
  - D. protect the flower at bud stage
- 17. Which of the following plants does not have a fibrous root system?
  - A. Rice
- B. Millet

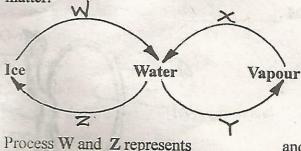

- C. Grass
- D. Beans
- 18. The rate at which water rises up the soil depends
  - A. size of the particles
  - B. amount of humus in soil
  - C. colour of the soil
  - D. air content in the soil
- 19. The largest planet in the solar system is
  - A. Venus
- B. Jupiter
- C. Saturn
- D. Pluto
- 20. Which physical change take place in girls only?
  - A. Wet dreams
  - B. Production of sex cells
  - C. Growth of pubic hair
  - D. Menstrual flow
- 21. Dried fodder preserved by drying is called:-
  - A. pasture
- B. silage
- C. hay
- D. concentrate
- 22. Fertilization in plants takes place in the:-
  - A. Ovary
- B. Corolla
- C. Stigma
- D. Style
- 23. Std. 5 pupils did the experiment below.

What will be observed after sometime?

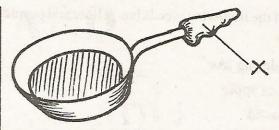

- A. The bottle will crack
- B. The balloon busted
- C. The balloon got inflated
- D. Nothing happened
- 24. The deficiency disease caused by lack of iron is called:-
  - A. Kwashiorkor
  - B. Anaemia
  - C. Marasmus
  - D. Scurvy
- 25. Which of the following statements is not true about a windsock?

- A. It has black and white stripes
  B. It is open on both sides
- C. It measures direction and speed of wind
- D. It should be placed in an open place
- 26. Convection is a method of heat transfer in:-
  - A. solids and liquids
  - B. liquids only
  - C. gases only
  - D. liquids and gases
- 27. The amount of matter in an object is its:-
  - A. mass
- B. density
- C. force
- D. weight
- 28. The following are rotational methods of grazing except:-
  - A. strip grazing
  - B. herding
  - C. paddocking
  - D. tethering
- 29. The diagram below shows change of state of matter:-

\_\_\_\_\_respectively.

- A. melting and freezing
- B. freezing and evaporation
- C. melting and evaporation
- D. condensation and freezing
- 30. Which two processes are as a result of loosing heat?
  - A. X and Y
- B. X and Z
- C. Wand Z
- D. Z and Y
- 31. The tube through which urine and sperms are passed in human beings is called:-
  - A. oviduct
  - B. sperm duct
  - C. epididymis
  - D. urethra
- 32. The diagram below shows a cooking pan.

The part labelled X should be made of:-

- A. wood
- B. alluminium
- C. glass
- D. copper
- 33. The fusing of male and female sex cells is called:-
  - A. fertilization
  - B. photosynthesis-
  - C. pollination
  - D. transpiration
- 34. The embryo of a seed is made up of \_\_\_\_\_and
  - A. anther and stigma
  - B. plumule and stigma
  - C. anther and style
  - D. plumule and radicle
- 35. The diagram below shows a method of heat transfer.

  METAL ROD

  WAX PIN

The method of heat transfer is called:-

- A. convection
- B. conduction
- C. evaporation
- D. radiation
- 36. The main function of fibre in the body is to:-
  - A. help in digestion
  - B. prevent constipation
  - C. give the body energy
  - D. help in absorption of food
- 37. Below are characteristics of clouds:-
  - (i) Puffy white in colour
  - (ii) Dome shaped
  - (iii) Have flat bases

The clouds described above are likely to be:-

- A. Nimbus
- B. Cirrus

D. stomach 38. Which of the following weeds has yellow and purple C. gall bladder 45. Which of the following statements is not correct flowers? A. Wandering jew about HIV/AIDS? A. It develops in stages B. Sodom apple C. Pig weed B. It can be cured D. Oxalis C. It is caused by a virus 39. The following animals feeds are legumes except:-D. It weakens the body immune system A. clover 46. Which of the following methods would not help B. lucerne prevent spread of malaria? C. desmodium A. Immunization D. nappier grass B. Draining stagnant water 40. The diagram below shows a weather instrument. C. Sleeping under treated nets D. Taking anti-malaria drugs 47. Which of the following deficiency diseases is prevented by eating plenty of citrus fruits? A. Scurvy B. Marasmus C. Rickets The instrument works on the principle that:-D. Anaemia A. Air expands when heated 48. The diagram shows a bean seed. The part labelled B. Air occupies space M . C. Liquids expand when heated D. Liquids occupy space 41. Which planets are in the fourth and seventh position from the sun? A. Mars and Uranus B. Earth and Jupiter C. Saturn and Uranus A. is called the seed coat D. Mars and Neptune B. stores food for the seed 42. Which of the following substances consist of those C. is part of the embryo that have definite shape and size? D. develops into shoot A. Water and oxygen 49. Which of the following does not pass through part B. Stone and wood R? C. Oxygen and carbon dioxide A. Water D. Kerosine and stone B. Radicle 43. Which of the following materials does sound travel C. Air slowest? D. Plumule A. Solid 50. The following are conditions necessary for B. Vaccum germination of seeds except:-

A. light

B. oxygen

C. warmth

D. water

C. Liquid

D. Gases

A. liver

44. Bile juice is stored in the:-

B. duodenum
