Read the passage below and answer questions 26 – 38

In those hard days, the hare and the hyena were good friends who swilled in the same boat of their lives. The two friends lived in Pegwet forest. A severe drought had struck the whole area and food for survival became minimal day by day. The lack of food forced the animals that lived in the environment to look for food from neighbouring villages. According to their traditional beliefs, women had the mandate to look for foods, but this time round both men and women had to shoulder the burden in order to feed their families.

Moving from one village to another was quite tiresome. Heat from the sun, wind, thirst and hunger made it worse and especially for the hyena whose back legs were short. Time to time he found it difficult to pass through loose sand which was all over the place. Movement was slower than they thought. In the next village, they found friendly people who gave them basketful of potatoes. It was not normal for such animals to carry baskets full of potatoes. They have found it difficult to carry heavy loads but he knew that they were lucky to get food.

The hare walked with much haste since darkness was approaching. He wanted to cross the bridge before darkness descended on them. The hyena was struggling to catch up with his friend but the load he carried made him walk slower. As they got close to the river that formed the boundary between the two villages, they realized that the river had not overflown its bank. They crossed it before it was dark and each headed for home with deep thoughts about their troubles which seemed to have no end.

During the last few days, hyena and the hare both seemed to have family problems. The hare complained that his wife, of late, no longer respected him. She even was planning to chase her away. The hare sympathised with his friend since his friend's problems seemed to be much more than his. This was a false pretence and if only the hyena could detect the crocodile tears being shed by the hare did not mean what he was saying. He was only cheating since he wanted to put his friend into more trouble, from the frying pan into the fire. The foolish hyena had it coming for he had trusted his false friend.

26. The area where the hare and hyena lived had _____
A. many good friends
B. severe drought
C. plenty of food
D. disrespectful wives
27. It is FALSE to say that _____

● Read the passage below and answer questions 39 – 50

Toads and frogs grow from eggs laid in water which hatch into tadpoles. These tadpoles are very like fish because they breath through gills. When tadpoles turn into frogs, gills are exchanged for lungs. Adult frogs breath air and use lungs to do it just as we do. They can also breath through their moist skins. The same happen to toads.

Toads lay eggs in long strings in ponds. The eggs hatch out as tadpoles. They look very like frogs' tadpoles. We can tell the difference by their colour and shape. Their mouths are different too. The tails of toads' tadpoles have rounded ends. Frogs' tadpoles' tails are pointed.

The tadpoles begin having frilly gills on either sides of their heads. As they grow older flaps of skin grow and cover the gills. Now the gills are inside the tadpoles' head, just as fish's gills are inside the head. Later the legs begin to grow. The back pair come first. Just before the toadlets or froglets come out and land, the front legs begin to grow and to poke through the flap of skin which cover the gills. When the tadpole become grown – ups, they come on to land completely.

These creatures spend part of their lives on land and part in water. These types of creatures are called amphibians. They cannot survive in complete dryness.

Amphibians are cold – blooded animals. This means that their bodies are the same temperature as their surroundings. Our bodies keep at the same temperature whether it is a cold day in winter or a sunny day in summer.

Frogs and toads hibernate. Toad pass their winter tucked away in holes in banks and so on. Frogs, on the other hand hibernate near water. They dig into the soft mud at the bottom of ditches.

Most toads and frogs make moist, usually a rasping croak. The males usually make most noise and have big vocal sacs in their throat which they fill with air. The noises are used in courtship. Male frogs attract females to ponds by the noise they make as they croak.

Paliishi vijana wawili wa *hirimu* moja. Kwa hakika walipendana kama ulimi na mate hata wazazi wao wakaonelea hakuna haja ya kuwatenganisha. Basi waliamua kuwapeleka watoto hao katika shule ya bweni iliyokuwa mbali kidogo na kwao. Vijana hawa waliitwa Kazungu na Katana.

Katika shule yao mpya walionyeshwa mahali pa kulala baada ya kupokewa na kinara wa shule hiyo. Baadaye vijana hao walitembezwa kwenye eneo la shule hiyo na wakaonyeshwa madarasa, viwanja vya michezo mbalimbali, maktaba na kadhalika. Katana alifurahia mambo yote aliyoyaona bali mwandaniwe hakupendezwa.

Kwa bahati nzuri au mbaya Kazungu na Katana walikwenda katika mabweni tofauti. Ilimbidi mmoja kumfuata mwenziwe kila wakati. Kwa ajili ya uvivu wa Kazungu, siku za kwanza za shule hiyo zilikuwa za taabu kwake. Hivyo basi wavulana hawa walikuwa wakienda kwenye chumba cha maakuli wakiwa wamechelewa. Mara nyingi walipata kuwa mlo umekwisha na kuwalazimu kukaa njaa. Mtindo huu uliendelea hata baada ya Kazungu kukanywa na mwenzake aache uvivu.

Baada ya majuma matatu, Katana alikata shauri kuvunja usuhuba huo kwani ulimpa taabu wakati mwingi. Alitafuta rafiki mwingine na kumtupilia Kazungu mbali. Kazungu naye kwa kuwa na mnyapara wa kumwamsha na kumhimiza, alizidi kuzembea shuleni. Alizidi kukonda na kukondeana kwa kukosa mlo. Kila mara alipoenda katika chumba cha maakuli alikuwa amechelewa. Kadhalika, aliadhibiwa mara kwa mara kwa kuchelewa darasani. Mambo haya yalifanya atoroke shuleni.

Wazazi wake walipomwona, walitaka kujua ni kitu gani kilichomleta nyumbani wakati ule. Shababi huyo aliganda ulimi. Hapo baba yake Kazungu wakaandamana na mwanawe mpaka shuleni ndipo akajue sababu yake ya kutoka shuleni kabla ya kufungwa.

Kufika shuleni alikaribishwa na kinara na hapo akaelezwa tabia za mwanawe. Kinara alimwita mwalimu wa darasa la kina kazungu ili adhibitisho jambo hili. Kinara alikubaliana na wenzake kwanza wampe mawaidha, kisha wamwadhibu kijana Yule. Kwa hivyo kinara alianza kumsimulia hadithi juu ya mvuvi aliyekuwa mwenye bidii za mchwa. Gange ya mvuvi huyu ilikuwa ya kwenda pwani kama wenziwe lakini afikapo huko habahatiki. Aliendelea hivyo na hakufa moyo. Lakini siku moja alibahatika na kupata samaki wengi kama wenzake

Kijana Kazungu alisikiliza kwa makini hadithi hiyo iliyotolewa na kinara. Baadaye Kazungu alipewa adhabu lakini kwa vile alivyosikiliza na kuzingatia funzo la hadithi hiyo, hakuichukulia vibaya. Kwanza Kazungu alijibidiisha kwa kila jambo na hatimaye alifaulu katika kila shughuli na pilka pilka mbalimbali pamwe na masomo yake.
