Although there are many uses of the mobile phone, the phone also has many disadvantages . We have become very lazy. A phone call is enough to pass a message. Many people do not care whether they hurt or excite you. They feel they have saved time. We have become too busy even to chat with a friend. A short message on phone is easier for us than visiting the friend.

We also have doctors who consult and treat patients on the phone. Is this right? I do not think so. The results are wrong prescriptions that can lead to prolonged illness.
