Read the passage below and answer questions 26-38.

The ratel is also called the honeybadger. It is a relatively small animal known to have the heart of a lion and courage of a giant. It has a massive head with a thick skull covered with muscles, well developed shoulders and long well-muscled forelegs armed with very powerful claws. Hence it is well adapted to digging and excavating. The ratel has very thick but loose skin on the body, making it difficult to grasp. This exceptionally thick skin around the throat is said to defy the bite of a dog or a leopard.

The ratel's food includes a wide range of food such as rodents, birds, amphibians, fish, reptiles, fruits and carrion although the contents of beehives are the major food at certain times of the year. Although the ratel can locate beehives, it has developed an interesting relationship with honey-guide, a bird, as its name suggests. The honey-guide conspicuously calls repeatedly at the same time, swooping from tree to tree.

The ratel follows the bird answering it with deep growls until it reaches its destination upon which the bird changes its behaviour and sits quietly in a nearby tree.

However, the relationship is born out of confidence. When the ratel eats to its fill, the honey-guide flies down and eats the remaining dead bees, grubs and pieces of honey-combs. The relationship is learned and developed by both and of course it increases the food supply for both.

Although the ratel is protected from the bee stings by its thick fur, it is not impervious to them. Cases of death of ratels have been reported either from tree falls or bee stings. Few deaths from getting crushed by bee-hives too have been witnessed.

Generally, ratels are loners but they also move in pairs of females or males, not necessarily a mating pair. However, little is known about their social life.

Their gestation period is about six months. The young ones probably remain in their home burrow for a long time. It is rare to see the adults with their young ones.

This species face a serious danger of extinction. The ratel has in recent times been poisoned, speared, ensnared and trapped by man. Protection of beehives has made the ratel to seek other types of food and in this way avoid confrontation with man.

26. How is the ratel suitably adapted to digging and excavating?

- A. It has muscled head and thick shoulders.
B. It has claws on its muscled forelegs.
C. It builds its home under the ground.
D. It has to hide from his enemies.

27. According to the passage ratels:-

- A. have small head but are as courageous as a lion.
B. are very small animals but some are as big as an elephant.
C. are small but are very courageous

- D. are as big as elephants and courageous

28. "..... is said to defy the bite of a dog or a leopard" means:-

- A. it can scare away dogs or leopards
B. it is impossible to bite through its thick skin.
C. it can bite the dogs and leopards.
D. it is easy to tear through the thick skin without harming it.

29. Which of the following is true about the feeding habits of a ratel?
- Its main food are the contents of the bee-hive.
 - It is a carnivorous animal.
 - It can even kill very big animals for food.
 - It has to eat honey in order to survive.
30. According to the passage, it is true to say that _____
- without honey-guide, the ratel would die of starvation.
 - the ratel helps the honey-guide to locate bee-hives.
 - without the ratel, the honey-guide would live a hungry life.
 - both the ratel and the honey guide benefit from their relationship.
31. "_____ until it reaches its destination" as used in the passage means:-
- when they reach home.
 - when they reach the birds home.
 - when they reach the bee-hive
 - when the bird changes its behaviour
32. According to the passage, the following are causes of a ratel death **except**

Read the following passage and answer questions 38-50

For days Leah had hardly slept a wink. Neither had she been able to eat or keep still. "I'm going to boarding school!" she murmured to herself repeated as she skipped around the house getting into everybody's way. Every now and then she would run into the bedroom she shared with her two younger sisters. She would open her brand new suitcase and take out all the new things that her parents had bought for her in preparation for going to boarding school. There were two pairs of sheets, towels, dresses, games kits, petticoats and other little things. Leah took them out slowly and admired them. She held them to her nose for that **peculiar** smell and freshness that new things have. Never had Leah had so many new things at one time. Her joy knew no bounds.

For years, Leah had longed to go to boarding school. Ever since her two friends, Anne and Rika, had been taken to boarding schools and had come back with a new grown-up hair and many fascinating tales, she wanted to join them. They had their own suitcases which they didn't have to share with anyone else, they got pocket money and could buy things for themselves like adults. They could do all kinds of naughty things away from the eyes of grown ups, like holding midnight parties with the left-overs from meals. What freedom! So Leah pestered her mother and father until they finally decided to grant her wish, so that they could get some peace.

Leah lost no time in informing Anne and Rika who were home for holidays. They were saddened that Leah was not joining them in their schools, but going to a different one. Their sadness however gave way to boredom as Leah went on and on about new things that had been bought for her and what she would do when she got to her boarding. They soon learnt to avoid her whenever they saw her approaching

Finally the day arrived and Leah's new suitcase, bulging at the seams, was put in the family car. It was only then that Leah experienced the first signs of remorse. Saying farewell to Roma and Rita, her little sisters, Simba the dog, sammy the cat and Rhoda their house servant suddenly proved to be very depressing. She began to wonder how she would survive away from the warmth of the family for a whole three months! It might as well have been a century.
