Read the passage below and then answer questions 26 to 38.

Sending children was always done in more than two. It was either to act as security of the other or to provide company. Likewise, it was for us to report if any of us misbehaved along the way or at the place we had been sent to. So, when Luka was sent to where his eldest sister was married, he resisted. It was a long distance away and one was not expected to return before evening. Upon refusing, his mother called Lowe and I to provide the company. Still, he had to be rebuked and threatened before he reluctantly agreed to go.

I can't remember what information Luka was to relay to his sister. Naturally, children shared such information so that should any of them forget, the others would still remind the bearer. We did not ask Luka what it was because, anyway, he did not look to be in the moods to talk to us until we were some distance away from home. Then, slowly, he started joining us in throwing stones at birds and making fun of cyclists who rode creakily past us. We never made mistakes in the fun we made for we knew the consequences of being too loud.

We walked, ran and laughed. It is this combination of activities that actually made us reach faster. Luka's sister had just come from her routine weeding when we appeared at the home. She was happy to see us and anyway, she had always been. To her, we were all her brothers and none of us was closer to her than the rest. In a very short time, she had prepared tea which we took with the reddish sweet potatoes.

As we were hungrily taking the tea, she disappeared. Immediately, Luka started urging us to leave before she returned but we told him that would be very bad manners. It did not take long, however, before she reappeared, carrying some fresh fish from the lake. She embarked into the preparation as if she knew what was in the mind of one of us.

Outside, we were expected to be playing in the compound but that was far from it. Luka kept urging us to leave because it was getting late. We wondered whether it was getting really late since we had not been ordered to return home by a specific time. The sister heard us arguing and rushed out. She shouted angrily at Luka and asked him to leave alone if he wanted to but the rest of us would wait for the meal. In that furious mood, she told Luka that he was not being tied there.

Somehow, the scolding drummed some sense into Luka's head. Food was soon brought and we ate so hungrily that one would have wondered where the tea we had just taken had gone to. We got satisfied but not at the same time. Luka remained eating alone, long after we had stopped and we kept stealing glances at the latest turn of events curiously. The sister did not hide her surprise.

All along the way back, we walked in two groups, Luka ahead of us and we trailing. He talked to neither of us and never looked back. We were comfortable that way for Luka had had double that day.

Read the passage below and then answer questions 39 to 50.

If you have ever gone to the Coast, then you must have seen the coconut tree. This is because they grow everywhere from people's doorsteps, city streets to the wild uncultivated areas. It grows well in tropical areas around the world. It grows very tall and without any branches, sometimes up to thirty metres high, with the leaves measuring four to six metres long.

The coconut, it is said, owes its name to the 16<sup>th</sup> century Portuguese sailors who thought the small holes on the fruit resembled a human face. Therefore, they name the fruit 'Coco' which means 'Grinning face' in Portuguese language. Although it is called a nut, coconut technically belongs to the fruit family called drupes, which includes other fruits like peach, plums and cherries.

It is common to see some coconut vendors slice the top of a coconut, put a straw in it and have one drink. This is done in the early growth stages when the coconut has a lot of water that can be consumed directly. The refreshing drink contains sugar, dietary fibre, proteins, anti-oxidants and minerals. However, the water is not the same as coconut milk. Coconut milk is squeezed from the blended, grated or chopped chunks of the white fleshy part of the fruit and also referred to as coconut 'meat'. The meat is high in milk fat and is a popular additive in rice dishes.

Coconut meat is also pressed for oil. The coconut oil has multiple uses - from cooking to being used as body massage oil. Since coconut tree grows very tall, wood from its trunk was preferred traditionally for building houses. The wood's straightness, strength and ability to resist salt made it a reliable building material for boats, bridges and houses in the tropics.

If you thought that that is all a coconut is worth, you will be pleasantly surprised to learn that the coconut leaves too have many uses. Some of these are: making brooms, weaving baskets and mats or dried and used as thatch for roofing houses. Such roofs are called Makuti-thatched roofs.

Although coconut is a drupe fruit, it does not get dispersed by animals like the rest of its family (it's too high up anyway). Instead, the coconut palm disperses its seed using the ocean. Coconut is very buoyant (can float easily) and highly water resistant and can travel very long distances across the ocean.

Bwana Aisee aliporejea jijini alifungua ofisi kubwa aliyoipamba kwa samani za hali ya juu. Kisha aliwasiliana na waandishi wa magazeti mbalimbali. Alidai kuwa kulikuwako na mradi kabambe wa kuhakikisha kuwa vijana waliokosa amali wangeajiriwa kazi za maana kwenye hoteli za kitalii huko Uarabuni na Ulaya na hata kwenye meli za kifahari. Viongozi wengi walimshehenezea Bwana Aisee sifa kemkemu, “Huyu ni mzalendo kindakindaki! Anawakumbuka raia wenzake ambao hawana bahati kama yeye!” Vijulanga waliokuwa na hamu na ghamu ya kuenda ugenini walifurika ilipokuwa ofisi yake.

Walichohitajika kufanya tu ni kulipa ada ya shilingi elfu tano pamoja na kiasi kingine kama hicho kugharimia vyeti vya usafiri. Licha ya kuwa wengi wao hawakuwa na namna ya kuzipata pesa hizo, walikuwa radhi kukopa wahakikishe kuwa wamepata nafasi hizo adimu. Vijana hao pia walitakiwa kuenda hospitali fulani ya kibinafsi kufanyiwa uchunguzi wa kimatibabu. “Aisee bwana, huo ndio ustaarabu wa wenzetu walioendelea. Ukitaka kumwajiri mtu lazima ujue siha yake ikoje,” Bwana Aisee aliwakumbusha. Hamna aliyejali. Kilichokuwa muhimu ni kuwa, baada ya miezi miwili wangepata kazi ambazo zingewafanya waupige kumbo la milele ukata uliotishia kuwagubika kama wingu.

Baada ya kuzikusanya hela hizo zilizolipwa na vijana zaidi ya elfu thelathini, Bwana Aisee aliwaambia wangoje kwa muda wa miezi miwili. Muda waliokuwa wamepewa wa kungoja mambo yaive ukapita. Tarehe ya kusafiri kuenda kuanza kazi zao ikaahirishwa. Taarifa iliyotoka katika ofisi kuu huko ulaya ilidai kuwa kuahirishwa huko kulitokana na hali mbaya ya usalama. Tarehe hizo zilipokwisha kuahirishwa mara nyingine mbili, kila mmoja alianza kutuhumu kuwa palikuwa na jambo. Malalamishi ya kila aina yalianza kusikika kwenye vyombo vya habari. Wakaanza kumsaka Bwana Aisee. Lakini hawakujua kumbe bwana huyo alikuwa ameingi mitini.

Uchunguzi wa historia ya Bwana Aisee ulianza kufanywa. Jamaa waliosoma naye walitoa habari zake zote bila kusaza lolote. Walieleza jinsi alivyokua fundi wa kuongea kizungu. “Lakini huyu si fundi wa kizungu tu bali na mizungu pia!” Walisema wengine kwa hasira walipozisikia habari hizo. Serikali ilianza mipango kabambe ya kumsaka Bwana Aisee. Ilibidi kuwashirikisha wachunguzi wa polisi wa kimataifa, INTERPOL, katika swala zima. Haikuchukua muda kabla ya kugunduliwa kuwa mashirika yaliyodaiwa kuhusika na suala la ajira hizo yalikuwa bandia.

Mambo yaliendelea kukanganya wakati ofisi ya Bwana Aisee iliyokuwa jijini ilipochomeka siku moja wakati wa usiku na vyeti vyote kuteketea. Nayo hospitali waliyokuwa wameenda kufanyiwa uchunguzi wa kiafya wale walioenda kuomba kazi ilifungwa ghafla na daktari aliyehusika kutoweka. Ilikuwa wazi sasa kuwa watu walikuwa wametapeliwa.

Kashfa hii ilizungumziwa na wengi kote nchini si katika redio wala runinga bali pia gazetini na kwingineko. Adinasi waliapiza. Lakini njia ya mwongo ni fupi. Aisee alibambwa na polisi wa kimataifa alipokuwa katika uwanja wa ndege wa Frankfurt huko Ujerumani akijitayarisha kuabiri ndege kuelekea Afghanistan alikopanga kujificha kwa muda hadi mambo yatulie.

Baada ya kutiwa mikononi, Bwana Aisee alisafirishwa chini ya ulinzi mkali hadi jijini Nairobi alipofikishwa mbele ya hakimu. Kesi yake ilihudhuriwa na mamia ya vijana waliohasirika. Mwishowe Bwana Aisee alitumbukizwa gerezani kwa miaka minane ikiandamana na kazi za sulubu. Mizungu yake ilikuwa imegota mwamba.

Tarakilishi ama kompyuta ni kati ya teknolojii mpya ambayo inatumiwa siku hizi karibu kila mahali mathalani katika kampuni kubwakubwa, benki, masoko makubwa, viwandani, viwanja vya ndege, meli, idara za serikali, vyuo, shuleni na kadhalika. Katika shule za upili, tarakilishi ni somo ambalo linashughulikiwa kuanzia kidato cha kwanza hadi cha nne na hutahiniwa katika mtihani wa kitaiifa wa kidato cha nne. Aidha, serikali iko katika harakati za kuwapa vipakatalishi wanafunzi wote wa darasa la kwanza katika shule zote za umma nchini.

Tarakilishi imegawanyika katika sehemu mbili muhimu: programu mfumo na maunzi. Maunzi ni neno jumlishi ambalo hutumika kwa kurejelea vifaa vyote vya kompyuta kwa mfano kichapishi, kishalekezi, kiwambo au skrini, kipanya na mashine chapishi. Programu mfumo ni neno jumlishi ambalo hurejelea programu zote zinazoweza kutumika katika kompyuta.

Vifaa vinavyotumika katika kompyuta ni vingi. Kiwambo hutumika kwa kuonyesha data ambayo inashughulikiwa, nacho kichapishi hutumika katika kuvugulia data hiyo kwa kompyuta. Kishalekezi ni kifaa ambacho huwaka kikizimika kwenye skrini nacho huashiria mahali ambapo data inayovuguliwa itaingia. Pahali pa kishalekezi panaweza kubadilishwa kwa kutumia kipanya. Kipanya ni kidude chenye mkia mithili ya panya. Baada ya kazi kukamilika na data kuwa habari mashine chapishi huichapisha habari hiyo kwenye karatasi ili isomwe na watu wengi iwezekanavyo, pahali pengi na pahali popote.

Tarakilishi ina sifa nyingi muhimu. Chombo hiki kina uwezo wa kufanya hesabu na kazi nyinginezo kwa kasi sana. Sifa nyingine ni kwamba tarakilishi huhifadhi ujumbe mwingi sana kwa matumizi ya baadaye. Maelekezo huchukuliwa na kuwekwa kwa ajili ya kufuatwa na chombo hiki. Mfululizo wa maelekezo haya ndiyo huongoza kompyuta katika wajibu wake na huitwa programu ambayo huandikwa kwa lugha ya kikompyuta. Kompyuta hufuata maelekezo haya kwa kuamshwa na binadamu. Sheria hizi huwa sahili na kompyuta ina uwezo wa kuzitumia ili kufikia uamuzi wa jinsi ya kutenda.

Kuwasiliana na mifumo mingine ya kompyuta ni muhimu sana na kompyuta ina uwezo wa kufanya hivyo. Kompyuta huingizwa data ambayo huchakatwa ili kuleta maana, na uzao wa kuchakatwa huku ndio huitwa habari. Programu ni mfumo wa utaratibu ambao umeandikwa kwa lugha ya kikompyuta. Programu huiwezesha kompyuta kuchakata data na kuifanya iwe habari kwa mfano, inaweza kuongeza nambari mbili au zaidi na kukupa jibu.

Katika kompyuta habari inaweza kuhifadhiwa katika diski ngumu au diski tepetevu. Diski ngumu ni nafasi inayopatikana katika kompyuta yenyewe na inaweza kuhifadhi maktaba nzima. Diski tepetevu ni ile nafasi ambamo disketi huwekwa ili habari inayochakatwa ihifadhiwe kwa disketi. Disketi ni kifaa kidogo mithili ya kaseti. Nafasi hizi za kompyuta zimegawanywa katika viendesha diski kwa mfano ukitaka kuhifadhi habari yako katika diski ngumu, utatumia kiendesha diski A. Ilhali ukitaka kuhifadhi kazi yako katika diski tepetevu utatumia kiendesha diski C.

Kwa hivyo kwa muhtasari, tunaweza kusema kuwa kompyuta ni kifaa au chombo ambacho hufanya kazi kwa kuongozwa na programu iliyohifadhiwa. Kompyuta hujiendesha yenyewe kwa kukubali na kuchakata data ili iwe habari.
