Ala! Nani hamfahamu Juma yule mtumwa wa pombe kijiji Lunda. Mpenzi wa anasa mwenye maneno mengi kama chiriku. Wakati mwingine huwafusi watu barabarani bila sababu yoyote. Wengine kijijini humwita mwendawazimu kwa kutojua asili shinda zake. Eeh.....anashinda nyingi bora tu umtazame kuanzia wayoni hadi utosini.

Juma huraukia kilabuni na kuifungia siku yake huko. Hakuna siku nimewahi kumkuta kwa heri tupu. Ukimwuliza hajambo atakucheka na kukufanyia utani "Wacha ujinga" hujibu kwa mara ya kwanza kwa lugha ya kiswahili.

Wiki iliyopita alitiwa baroni kwa kupatikana na chupa kadhaa za mvinyo alizoziba kwenye kilabu cha pombe cha Bondeni. Baa hiyo hujulikana sana kuvamiwa na wakora ambao hupora mali yake. Hiyo ndiyo hali ya maisha ya Bondeni kilabu ambacho ukiingia ni harusi na kutoka ni matanga, lakini mbona wengi hukipenda?

Nani hamjui Juma mtaani Lunda? Hata kitoto kichanga kinachosomea chekechea kinamfahamu mraibu huyu wa mvinyo. Husalimia wakubwa kwa wadogo ovyo ovyo. Ungemkuta Juma kwa mara kadhaa pembeni mwa barabara akitabawali. Heshima zimetoka. Ameuzika ustaarabu na kuufukua upumbavu usiofaa. Kuna uvumi eti alimaliza masomo yake ya chuo kikuu lakini bado kuna shaka inayotiliwa kwenye porojo hizo. Anapozungumza, Juma hutokwa na kiingereza kinywani kana kwamba kaimeza kamusi nzima ya kiingereza na sasa kayatapika maneno tu! "You silly idiot cannot control the smart brains of Harvard University" hiyo ndiyo lugha yake yenye maudhi mtaani, ikimpata jina la bandia 'Professa Juma! Amebadilika ajabu akidi!

Hana heshima kamwe! Hata walimu wake waliomfunza katika shule huzungumzia aibu zake kila wamwonapo. Kwao haishi kamwe! Makao ni danguroni. Huja nyumbani wakati aliofilisika pekee. Huingia chumbani mwao na kukwapua fedha za wazazi bila haya wala soni. Alianza wizi pindi tu alipoanza kunywa pombe. Aliwapoteza rafiki wema na hadi leo hana rafiki ila genge la majambazi kijijini. Ulevi umemiliki, umeumiliki ubongo wake na fikira zake razini. Juma ameitumikia pombe sana na ni heri kutoyasahau majukumu ya maisha yaliyomwandama siku za usoni.

Mzaha mzaha hutunga usaha. Nao usaha hunuka na una aibu. Aibu nayo huleta majuto na kushuka kwa heshima. Afanyaye jambo lenye aibu haishimiki.

Kwa miaka ayami, wimbo wa uhifadhi wa mazingira umekuwa unywani mwa wengi. Kila kukicha tukaelezewa tujiepushe na ukataji ovyo wa miti. Tukahimizwa na kuelimishwa kuwa iwapo tutaikata miti, basi tuijandae mingine papo hapo.

Tulielezwa tele kuhusiana na utumiaji mbolea asilia ambayo haina madhara katika udongo wetu. Hatukukosa wosia na nasaha kuhusiana na mbinu mwafaka za kilimo ili kuepuka au kuzuia mmomonyoko wa udongo. Lakini yote hayo, wengi wetu tuliyatemea mate. Ikawa ni sawa na kumwashia kipofu taa. Ni sawa na kumpigia mbuti gita.

Tulishauriwa kutochafua mito yetu lakini tukaigeza kuwa mabomba ya uchafu. Ni jambo la kusikitisha kuona baadhi ya wawekezaji wakielekeza mifereji ya maji taka kutoka viwandani mwao hadi mitoni au maziwani.

Si ajabu tena kuona mifereji kutoka vyooni ikielekezwa hadi mitoni. Isisahaulike maji ya mito yiyo hiyo yanatumiwa na binadamu, mifugo, ndege na wanyama pori.

Ukizuru mitaa yetu, utashangaa kuona kuwa, nusura, katika kila sehenu wazi, imegeuzwa kuwa biwi la takataka.

Mirundiko ya takataka inayonuka fee imesimama kwa aibu kila mahali. Ni aibu na fedheha yetu hiyo. Kivuli hicho cha fedheha kinatundama popote tuendapo licha ya kujiita wastaarabu wa wajuaji.

Matokeo ya hayo yote ni masaibu tele yanayotufuata. Hatuachi kulalamika kutokana na maradhi ya kila aina. Tutaepukaje maradhi ilhali baadhi ya mboga tunazotumia hunyunyiziwa maji ya takataka!

Maradhi yatokanayo na uchafuzi wa hewa limekuwa jambo la kawaida aushini mwetu. Mikurupuko ya ndwele kama vile kipindupindu si jambo geni maishani mwetu. Kweli usaha hunuka. Nayo majuto ni mjukuu mwishowe huja kinyume.

Uhaba wa chakula ni tisho kubwa kwetu kutokana na mbinu mbovu za kilimo, migunda yetu inazidi kushindwa kutosheleza mahitaji yetu.

Mito yetu nayo inazidi kukauka. Viumbe vya majini vinazidi

Read the passage below and answer questions 26-38

Once upon a time in a small and bushy village there lived an old woman called Mrs. Omar. She lived with her two grandsons Karim and Adhiambo. During this time there were many Hyenas who wandered all over searching for food.

Mrs Omar advised the boys on how to live in this area inhabited by Hyenas. She warned the boys not to play until late in the night and also avoid leaving the door open. However, the naughty boys did not heed to her advice thinking that their grandmother was merely joking.

Karim and Adhiambo also argued a lot over house chores. When Karim was told to do any work, he claimed that it was Adhiambo's turn. Adhiambo would then claim that it had been Karim's turn. The argument would go on until the old woman did the work herself.

"One day you will pay dearly if you do not change your wayward behaviour", she warned them. However, they just laughed off and cracked jokes about it. One day, Mrs. Omar went on a safari to visit her relatives in a far away

village, leaving the two naughty boys behind. The following morning after breakfast, Karim and Adhiambo went out to play. As usual they argued over who was to close the door. Both claimed it was not their turn. Their argument did not end. Finally, they went out leaving the door wide open. Later, a Hyena entered the house, ate the food that was left and rested in a corner. The Hyena slept until late in the night.

The boys played until late against their grandmother's warning. They returned to find the door wide open just as they had left it. They entered without realising that the Hyena was inside. This time Karim volunteered to close the door for they knew that it was dangerous to sleep, with the door open. As soon as they lit the lamp, the Hyena got startled from his sleep and laughed loudly, scaring the duo. They started running helter skelter, colliding against each other and the Hyena. The frightened Hyena hurt the children in the process.

Neighbours heard the unusual noise and came to see what was happening. They rescued them though they were badly injured and bleeding profusely. The neighbours rushed the boys to a nearby hospital. Karim and Adhiambo were both stitched and dressed. The doctor advised them to visit the hospital after every two weeks to change the bandages until they got healed.

The old woman returned the following day to find her grandchildren nursing their wounds, she was scared out of her wits. She sympathised with them but it was too late, the damage had already been done. She reminded Karim and Adhiambo that she had severally warned them but they did listen to her. After this unfortunate incident, the children changed and became good boys.

Surgery is a medical treatment carried out by performing an operation on the affected part of the body. The doctor who performs an operation is called a surgeon. The doctor

gives a dose of chloroform to patients before an operation. After that, parts of the patient's body may be cut off. In modern surgery, sometimes it is not necessary for the patient to be unconscious.

A young Scottish doctor called James Simpson found out that surgery was very necessary to the medical profession. However, the procedure was very painful and sometimes patients died due to the pain. Other patients feared the pain and preferred suffering from serious diseases than having a surgery. In 1847, James Simpson discovered chloroform.

Chloroform was highly accepted in the medical profession as it made operations painless. However, a few weeks after a successful operation patients died. Doctors said that the deaths were caused by blood poisoning. A young doctor called Joseph Lister, who worked in a Glasgow hospital, decided to find out what caused blood poisoning in the patients. After many weeks of continuous observations, Lister discovered that blood poisoning was caused by germs. The germs survived in the air and water. The germs go into the wounds causing them to become septic or infected. The poisonous matter then goes into the blood.

In 1865, Lister found that no germs would live in carbolic acid. It was a strong antiseptic in fighting off germs. In addition, carbolic acid could not harm the body when applied outside the body. It was harmful only when swallowed. Therefore, carbolic acid was accepted and used to treat wounds after surgery.

One problem however remained a puzzle to the surgeons. It was difficult to know which diseases needed surgical treatment. It was also difficult to know the exact spot that was to be operated on. For example, a bullet buried deep in the body could hardly be spotted. This troubled the thoughts of German Scientists. By applying scientific know how, Rontgen, a German scientist, discovered the X-ray in 1895.

X-rays are powerful rays which can pass through solid substances which ordinary light cannot pass through. At first, Rontgen, could not make out what caused the powerful rays. He therefore called them X-rays, that is unknown rays. Rontgen was awarded a Nobel prize for Physics in 1901.

Today, doctors all over the world use X-ray photographs to locate the exact position of a disease in the body. X-ray are also used in treating diseases located deep in the body. Treating diseases by X-ray is referred to as 'radio therapy'.
