Read the passage below then answer question 26 to 38.

I had a very difficult childhood. Sometimes I would wake up in the dead of the night sweating profusely and with my heart beating loudly. My mother had gone to live in a foreign country. She did not want my father to look after me. She claimed that he was a habitual drunkard and was very irresponsible. She therefore put me under the care of her parents. What she feared most was that her in-laws or my father’s family would take me away. She advised my grandparents to keep moving me from one school to another. So I ended up going to three different schools during my last year of primary school. This greatly affected my performance. From an ‘A’ pupil, I permanently occupied the last position in class. I lost interest in school work and hated being in school.

My grandparents were not easy to live with. They hardly talked to me and so I kept to myself most of the time. My grandparents were unkind to me and really nasty to each other. Half of the time they were quarreling with each other and did not seem to agree on anything. My grandmother loved theatrics and on more occasions than one, she would wait until midnight to go around the house singing loudly. On his part, grandfather would completely ignore her. He would get into bed and fall asleep, oblivious to the hullabaloo in the house.

All this disturbed me greatly and I found it difficult to sleep. I often sat up in my bed to read my favourite book. I had read the book over and over and I knew all the stories like the back of my hand. I longed for the day I would have enough money to buy myself another storybook.

One night my grandmother’s theatrics had died down, I fell asleep and had a strange dream. I heard the sound of gentle but firm steps approaching the front door. My window overlooked the front door and so I could easily see who it was at the door. It was dark but I could see a figure standing at the door. I heard a soft knock, then the door latch moved and the door clicked open.

The figure at the door entered the house gently and called my name. The voice sounded familiar. I got up quickly and opened the door to my bedroom.

“Pendo, I want you to come and live with me. Please come. You must leave this place,” said the kind voice.

I could not believe my ears. It was the voice of my father. Then my father and I were in another country where people were friendly to me. My new school was exciting and full of fun. My new friends and I were playing basketball. As I stretched my hand out to score, I suddenly woke up.

I felt greatly disappointed to find myself in my miserable bed. I got out of bed. The morning was unusually quiet. As I got out of my room, I wondered where everyone was. Then I looked outside. I saw my grandparents talking to a smartly dressed lady. It was aunt Mumbi. She told me that she had come for me! From that day, my life changed for the better.

Read the following passage and then answer questions 39-50

Kenya has developed a comprehensive development plan covering the years 2008 to 2030. This development plan is called Vision 2030. Its aim is to enable Kenya develop into a middle income country that is able to provide a high quality of life to all its citizens by the year 2030.

The process of developing vision 2030 was launched by President Mwai Kibaki on 30th October 2006. Kenyans from different sectors met and discussed the development problems that the country was facing. They suggested the goals that the country needed to achieve by the year 2030. They also proposed different plans intended to solve the problems and achieve the goals.

Kenya’s vision 2030 is based on three pillars; the economic pillar, the social pillar and the political pillar. The economic pillar aims at raising productivity in the informal or jua kali sector, increasing jobs and improving people’s income. It also aims at improving infrastructure such as transport and water supply and reducing the cost of energy. The sectors that are supposed to drive the economic pillar include tourism, agriculture and manufacturing.

Through the social pillar, Kenya hopes to achieve a just and united society that respects quality and that lives in a clean environment. The social pillar is also concerned with Kenyans who have various challenges and with communities that live in harsh environments. This pillar emphasizes the use of science, technology and innovation to empower Kenyans. Key sectors in this pillar include education and training, health, water and sanitation, and environmental conservation.

Finally, there is the economic pillar. This aims at building a strong political system that protects the rights and freedoms of all Kenyan citizens.
According to its design, Vision 2030 is to be implemented in ‘five year’ plans, the first being 2008 to 2012. When fully implemented, Vision 2030 will bring about changes that will enable Kenyans to have a much higher quality of life by the year 2030.
