Jerry and her sister usually go to school by bus because it is very far from their home. It is about five kilometres away. One day Tithy's sister woke up late.

"Where is Jerry?" she asked.

"He has already gone," said her mother. "He didn’t want to miss the bus." Tithy took her breakfast very fast and went to the bus stop. The bus had left. The poor girl had to walk to school. She walked faster down the hill and managed to cover three kilometres. The sun was very bright and this scared her very much.

She decided to run to school because it was getting very late. As she was running, she fell down and hurt her leg. She managed to reach school when the second lesson was ending. All her classmates laughed at her because they had learned so many new things.

Read the passage below carefully and then answer questions 41 to 50.

Village weaver birds may be seen in cities, towns and villages. The males are bright yellow with a black head and red eyes. The females are whitish and yellowish in colour.

Village weavers usually nest in groups called colonies. They often build nests in tall trees in market centres and school compounds. The males tear off strips of palm and banana leaves and use them to weave a strong, light nest. The males then sing and display themselves.

These birds feed on insects, grass, seeds and fruits. They feed insects to the young ones who need the protein to grow.
