Read the passage below and answer questions 39 – 50

Siamese are town cats and it is hard to think of them going out into the fields to hunt for mice. Nobody is quite sure where their first home was, but it does seem that they have come to us from Siam, where they were regarded as royal animals. With short smooth hair, pale body and dark feet, face, ears and tail, the Siamese is a very good looking cat, with beautiful blue eyes.

In some ways, Siamese seem rather more like dogs though, of course, they are true cats in every way. For instance, they attach themselves to people rather than to the home, and they enjoy going for walks or rides in the car. They have quite a different voice from other cats, not a miaow, and they are very talkative. Some Siamese cats also like watching television, especially animal programmes, and others, surprisingly they like to go for a swim. The seal point Siamese is the kind most people know. They have darker ears, paws, tail and face marks. There are however chocolate, lilac, blue, red and even tabby point Siamese.

Their short coats need little attention for they can never get into a tangle, but Siamese cats must be looked after properly, just like any other kind. Sometimes they may enjoy a few table scraps but it is much better to give regular food, either tinned or cooked. Twice a day, at about the same time; give just as much as they can finish up. Siamese hardly ever drink milk. They must always have a bowl of clean water.
