"My legs hurt. Ooh! My head is aching. I have a stomach ache. Oooh! Somebody help!" he cried continuously. The lady bird heard him and got concerned. He approached the members of the neighbourhood requesting each to intervene.

"Pigeon's problem is pigeon's problem," said the antelope and his counterparts. The ladybird alone could not give a solution to pigeon's problems, moreover, he was too tiny.

A hunter was passing by and heard the pigeon complaining. He had not caught anything and dusk was already setting in. He thought to himself that pigeon's meat would make do for dinner. He aimed at him and with one shot, the pigeon fell down lifelessly. The hunter went to pick the pigeon only to find a very healthy mushroom.

"Mushroom soup would taste great," he said as he uprooted it. He looked around and saw the banana plantain. He decided to cut some of the leaves to wrap his catch. When he went to cut some of the leaves to wrap his catch, he recalled his hungry cow at home and cut down the plantain.

Read the passage below and then answer questions 39 to 50.

Money and time are two factors you cannot ignore to budget. As a student, you may not have a lot of it but it is wise to consider how to budget and spend the little you have. A budget is a plan. It indicates the amount of money or time available and the amount required to meet your needs.

The first step is to identify your needs, how much it is needed to meet these needs, their urgency and importance. Some needs are urgent and important thus should top the priority. Others are important but not urgent, thus should wait. Some are neither important nor urgent, thus you may need to forego them. This, therefore, calls for planning and budgeting.

Making a budget is not a difficult task unlike sticking to one. It requires careful consideration and the ability to balance your needs with your expenditure. A list of all your requirements or needs comes in first, find not the cost of each item and eventually the total cost. Consider the amount of money available for these needs, distribute and assign the money according to the priority list and spend it as indicated. Any violation will lead to impulse buying which will cripple your plan. Finally, it is advisable to keep a written record of your spending.

Benefits of making a budget are quite logical. First, you can do forward planning. This enables you to think of savings and investment for the future. Secondly, making a budget helps you save for a rainy day. This means you will have something put aside for a special need.

Without a good budget, one is likely to spend money carelessly and unwisely forgetting that there are more pressing needs. Moreover, one will have no way of accounting for the money spent. There will be no money left regardless of essential needs still needed by the family. Lack of a budget will force one to borrow from friends. This puts someone in uncalled for and unnecessary debt. Paying back a loan and still keeping going yourself is not an easy task. It is a real struggle! All these problems can be avoided if you simply make it a habit to always prepare a budget.
