Ufisadi ni ile hali ya kumtendca mwenzio jambo linalokwenda na kinyume na haki na maadili. Hivyoo basi imekuwa nadra kupita siku bila kusikia katika vyombo vya habari kuhusu uhuma za ufisadi. Uhuma hizo hutolewa dhidi ya afisa wa serikali, polisi, idara ya furaha, waajiri, wafuta zabuni, waombakazi na wengine wenge. Aghalabu utasikia ikisemwa kuwa walijaribu kuhonga ama kutishia hongo ili kutendewa ama kuwaaf尼亚 bila wahusika.

Swali lango ni je, kwa nini tunung’unike ilhali tuna Tume ya Maadili na kupiga vita ufisadi ambapo tuna poswa kupeleka malalamishi yetu? Tutajifunza vipe kujiamini na kudai tutendewe haki? Kwa nini umape pesa polisi kwa madai kuwa umefanya kosa ambalo kwa hakika hujafanya? Kwa nini umonje daktari ili uhudumije haraka kwa kuwa hutaki kupiga foleni?

Ni hakika kama matai kuwa ufisadi ni jinamizi lililo ndani ya nafasi zetu. Ilile kuuangamiza, tunahitaji moyo wa kujitolea usio na ubinafsi.

Tahitians, for instance used tattoos as a permanent way of preserving their culture and to show social ranking. Early Christians, on the other hand, often had the sign of a cross tattooed on their bodies, particularly their faces and arms, representing a permanent mark of the believer’s faith.

The word ‘tattoo’ is derived from a Tahitian word tatau that means to mark. Tatau has been suggested to be the onomatopoeic sound tap, tap, tap made by the tapping of a tattoo instrument as it works on skin while ‘au’ is associated with the cry of pain a person gives when being tattooed.

The first ever tattoo to be found on a human being was found on a mummified iceman in 3,300BC with 58 tattoos on his body, which contained lines and dots. This is nothing, however, compared to Scottish Tom Leopard, recorded as the world’s most tattooed person, with 99.9 per cent of his body covered in leopard skin design. Guinness world records record that the only part of his body that remained untattooed is the skin between his toes and inside of his ears.

When receiving a tattoo, the skin is pierced between 50 to 3,000 times per minute by a needle in the tattoo machine. Most tattoo machines consist of four parts: the needle, the tube that holds the ink, an electric motor, and a foot pedal that controls the movement; almost similar to how a sewing machine works.

Sterilization and disposable materials are crucial to tattooing because tattoos are created by thousands of puncture marks to the skin, each of which could be infected. The autoclave is a safe popular way to sterilize any tattoo equipment that is not disposable. A combination of heat, steam and pressure kills all bacterial and organisms to prevent infection.

In the late 18th and early 19th centuries, tattoos were dangerous to have. European ‘head hunters’ caused a terror by collecting tattooed Maori heads. As the odd sport became popular, more Maoris were murdered to meet the demand. In the time, slaves began being tattooed so that their heads could be cut off and sold. Luckily, however, Christian missionaries in the Cook Island condemned the practice of tattooing quoting the Bible “… do not cut your bodies for the dead or put marks on yourself…” They tried to stamp out the custom going as far as trying to remove tattoos by rubbing the skin with sandstone in a practice was known as ‘holy stoning’. This was the primitive forerunner to modern tattoo removal known as dermabrasion, where the skin is ‘sanded’ to remove layers. Dermabrasion has now largely given way to laser surgery as a popular means of tattoo removal.

While tattoos bring colour to humanity, research has shown that unclean tattooing practices can transmit diseases such as hepatitis B. Some pigments used in tattoos contain metals that can cause pain during a Magnetic Resonance Imaging (MRI) test, or even affect the resulting MRI image. Because of the possible negative effects tattoos pose to humans, those keen on getting one have to be very careful before they get one. That said, it is important to note that presently, many tattoo artists earn a good living out of the art.

Read the passage below and then answer questions 39 to 50.

Education ought to build us psychologically and intellectually. We should shed off our ignorance as a snake sheds off its skin and walk on a new path of knowledge and wisdom. There needs to be great difference between learned fellows and fellows who lack knowledge. An educated person has the ability to analyze information and makes conclusive decision from it. They don't take things literary but look into them and see the hidden truth in them thus criticizing them and finding the helpful part they display.

When one gets to a market or a tea cafe, if he is educated, he will get straight to knowing the ingredients of the food or product he wants to consume before thinking about its taste. It is wise to realize that this man will understand that not all that the mouth likes is good for the stomach. They understand the importance of adding what is lacking than building on what is in excess. This is spread across all day to day activities.

Education not necessarily mean going to class and moving through the levels of knowledge acquisition but it rather means staying steadfast to the acquired knowledge and bringing out the elements of an educated person, that is, analysis, critical thinking, assertiveness, decision making and problem solving. Anyone who shows deficiency of these is considered uneducated, barbaric or uncivilized.

Although education brings civilization and total dependence, it is good to realize that culture trains morals and trims immorality. Let not the acquired knowledge rub the inherited wisdom from your blood. Always remember that what the world consider bad is bad however how many books and experiments prove it good.
39. From the first sentence we can conclude that
A. education should change us for the better.
B. no progress can be made without education.
C. all educated people are successful.
D. none of us is psychologically upright without education.

40. The results of education, according to the passage are
A. wisdom and ignorance.
B. wisdom and knowledge.

D. ability and security.

41. The writer suggests that learned fellows and those who are not should
A. have differences.
B. always think of their differences.
C. be distinguishable.
D. not easily mix.

42. An educated person criticizes information so that
A. it lacks meaning in his life.
B. he gets the bottom truth from it.
C. he may realize how less it is important to him.
D. he may utilize it accordingly.

43. From the passage, it is TRUE to say that
A. usefulness of a product is in its contents not taste.
B. taste of all ingredients in a product may be deceiving.
C. some ingredients taste better than others.
D. all products have sweet taste.

44. The writer suggests that emphasis should be put on
A. what is already available.
B. what is lacking.
C. everything found.
D. nothing less than desire.

45. True education, according to the passage means
A. going to class and learning.
