It is important to plant trees. Trees help attract rain. With the presence of forests in our land we get plenty of rain that makes farming easy. Crops are grown and people are able to feed themselves.

Trees are also important because they are homes to many wild animals. They include cheetahs, leopards, lions, zebras and giraffes. These animals attract tourists in our country. Tourists bring money to our country.

Trees are also a source of food to man and many animals. They also act as medicine for many diseases. We should therefore conserve our trees. Let us make it a habit to plant trees and not cut the existing trees.

Our country is now suffering due to drought that has been caused by lack of rain. This is because we have participated in cutting down trees in our country.

Read the passage below carefully and answer questions 41-50.

The barber and his wife now led a comfortable life and easily afforded three full meals a day. The barber had now become a farmer, largely due to the efforts of his wife. Many people in the city came to know about the barber’s achievements and among them were also the thieves who had been made to plough the field.

When the thieves realised that they had been tricked by the barber’s wife, they grew very angry. They decided to go to the barber’s house and ask for their share of the harvest.

The barber was puzzled to hear the thieves’ words but to his relief, his wife also came there and said with laughter, “I told you there was gold in the ground but you didn’t find it. I have and there’s a jar full of it in the house, only you shall never have a coin of it!”

Then the thieves left the house, threatening the husband and wife to rob their house that night.
