Trees are important to both human and animal life. As we move around we see trees on our compounds, in valleys, in the forest and even on streets. In our homes trees occupy about twenty percent of our land.

Trees in our homes are planted for fruits, shade, firewood and beauty. Different trees are planted for different purposes. Different types of trees are planted in different positions because of their uses. Mostly fruit trees are planted in the garden near houses while firewood trees may be planted at the edge of the shamba far away from the house. Trees meant for beauty are planted in front of the houses.

Trees that grow in the bush on their own are of great help to birds and animals. They make a home of animals that live there throughout their life time. Birds on the other hands make their nests on these trees and feel protected from their enemies.
