STANDARD SEVEN MID TERM ONE EXAM 2018
SCIENCE

1. The passage of both the sperms and the urine in the male reproduction organ is known as
   A. sperm duct
   B. penis
   C. urethra
   D. testes

2. Excess medicine that remain should be
   A. shared with other people
   B. thrown into a pit latrine
   C. kept for later use
   D. given to people suffering from the same disease

3. Which of the following statements is **CORRECT** about an air thermometer?
   A. The scale should be labelled from the bottom to top
   B. A plastic bottle should be the best
   C. Clear water is recommended for proper observation
   D. When it is hot, the level of water in the straw goes down

4. Which list consists of the parts of a flower that make up the pistil?
   A. Ovules, stigma, style, ovary
   B. Filament, anthers, pollen grains
   C. Corolla, sepals, anthers
   D. Stigma, ovary, sepals, filament

5. Std 6 pupils placed bean seeds in wet cotton wool and then kept in a refrigerator for three days. Which condition for germination were they investigating?
   A. Water
   B. Warmth
   C. Oxygen
   D. Sunlight

6. Which one of the following is **NOT** a sign and symptom of cholera?
   A. Severe diarrhoea
   B. Abdominal pain
   C. Dehydration
   D. Blood in the stool

7. The type of soil erosion in which a uniform layer is removed and deposited on the lower part of a slopy land is known as
   A. sheet erosion
   B. gully erosion
   C. splash erosion
   D. rill erosion

8. Which one of the animals below are **CORRECTLY** grouped?

   **Warm blooded** | **Scales on the body**
   -----------------|------------------------
   A. Hawk          | Toad
   B. Salamander    | Whale
   C. Shark         | Dolphin
   D. Bear          | Trout

9. All the following are sources of light **EXCEPT**
   A. stars
   B. fireflies
   C. moon
   D. candles

10. Which one of the following methods of food preservation is both traditional and modern?
    A. Canning
    B. Low temperature
    C. Use of ash
    D. Freezing

11. Which one of the following materials can be grouped together with skylights?
    A. A mirror
    B. Spectacles
    C. Frosted glass
    D. Dirty water
12. The force that pulls objects towards the earth is known as
   A. gravity
   B. inertia
   C. pressure
   D. mass

13. The diagram below represents the female reproductive system

   ![Diagram of female reproductive system]

   Which statement is CORRECT about the labelled parts?
   A. P - allows the baby to grow
   B. R - allows fusion of male and female sex cells
   C. Q - receives the male sex cells
   D. S - produces the female sex cells

14. The following are signs of a certain disease:
   (i) Body weakness
   (ii) Coughing of blood at times
   (iii) Prolonged coughs
   (iv) Chest pains
   (v) Fever

   The disease can be prevented by
   A. Drinking boiled water
   B. Living in well ventilated rooms
   C. Draining stagnant water
   D. Covering the holes of pit latrine

15. Which one of the following is NOT needed when modelling the sky?
   A. Cotton wool
   B. Coloured pencils
   C. Pins

16. The diagram below shows an experiment done to investigate a certain component of soil.

   ![Diagram of experiment]

   The component being investigated is
   A. minerals
   B. air
   C. humus
   D. water

17. Which one of the following animals feeds is a type of stored dry fodder?
   A. Silage
   B. Hay
   C. Desmodium
   D. Star grass

18. In which stage of HIV infection does the victim show no signs but any medical test reveals the presence of the virus in the blood?
   A. Incubation
   B. Full blown
   C. Symptomatic
   D. Window

19. Which one of the following is green non flowering?
   A. Mushroom
   B. Penicillin
   C. Algae
   D. Sorghum

20. A rain gauge is dug about 15cm into the ground MAINLY to
   A. make it firm
B. reduce evaporation of the collected water
C. prevent water from splashing into the funnel
D. make it withstand harsh outdoor conditions

21. Which one of the following lists consists of animals with a backbone?
A. Cobra, tortoise, millipede
B. Earthworm, weevil, beetle
C. Hippo, butterfly, chameleon
D. Gecko, owl, bat

22. The type of soil which has the highest capillarity
A. feels rough between the fingers
B. cracks when dry
C. also has large airspaces
D. does not hold together when wet

23. Which pair consists of both energy-giving foods?
A. Wheat and groundnuts
B. Sunflower and lettuce
C. Fish and milk
D. Rice and peas

24. Which one of the following is NOT a deficiency disease?
A. Kwashiorkor
B. Malaria
C. Anaemia
D. Rickets

25. Which one of the following is the last step when setting up an experiment to demonstrate conduction of heat in solids?
A. Fixing the pins onto the candle wax
B. Heating one end of the metal strip
C. Fixing the metal strip onto the support
D. Fixing candle wax onto the metal strip

26. The diagram below shows an experiment done to demonstrate a certain factor that affects floating and sinking:

27. All the following are good conductors of heat EXCEPT
A. iron
B. copper
C. wood
D. aluminium

28. A certain animal has the following characteristics:
- lay eggs
- cold-blooded
- body covered with dry scales
- breathes through lungs
The animal is likely to be
A. a toad
B. a crocodile
C. a duck
D. a shark

29. Food mixes with gastric juice in the
A. stomach
B. mouth
C. ileum
D. duodenum

30. The illustration below shows changes of state of matter:

---
Which pair of the process labelled WXY and Z represents melting and condensation respectively?
A. X and Z
B. W and Y
C. Z and X
D. Y and X

31. The substances contained in foods that help to maintain the good health of the body are known as
A. nutrients
B. food
C. meal
D. nutrition

32. Which statement about sound is TRUE?
A. The extent of loudness or softness of a sound is called pitch.
B. The shape of the eardrums most animals help to amplify sound.
C. Noise makes people alert.
D. A choir singing loudly will cause noise pollution.

33. Which one of the following aspects is common to both steam and flour?
A. Definite shape
B. Definite volume
C. No definite shape
D. Definite mass

34. An example of a recreational use of water is
A. rearing fish in ponds
B. bathing
C. surfing
D. making fountains

35. All the following are likely to take place when heat is reduced on different states of matter EXCEPT
A. reducing in size
B. condensing
C. freezing
D. melting

36. Which one of the following is NOT a way in which different animals protect themselves from danger?
A. Flying off
B. Biting
C. Hiding in shells
D. Sucking blood

37. Which one of the following changes in adolescence occurs in both boys and girls?
A. Increase in height and weight
B. Growth of breasts
C. Wet dreams
D. Broadening of hips

38. The pie chart below represents the composition of air.

The gas which is used to put out accidental fires is named
A. L
B. K
C. M
D. J

39. Which one of the following aspects of light results to formation of the rainbow?
A. Dispersion
B. Reflection
C. Refraction
D. Moving in a straight line

40. When modelling the solar system
A. the balls to represent the planets should be of the same size
41. Which part of the flower becomes the fruit after fertilisation?
   A. Petal
   B. Ovary
   C. Ovules
   D. Anthers

42. Which one of the following practices will help make water safe for drinking?
   A. Filtering
   B. Storing in a clean container
   C. Mixing it with soap
   D. Boiling

43. Which one of the following is NOT a requirement for good health?
   A. Medicines
   B. Food
   C. Exercises
   D. Sleep

44. A snail moves by
   A. walking
   B. crawling
   C. sliding
   D. slithering

45. Which one of the following plants has separate male and female flowers on separate plants?
   A. Maize
   B. Sugarcane
   C. Millet
   D. Pawpaw

46. Which one of the following is NOT an importance of HIV testing?
   A. To make a decision on marriage
   B. To plan for future of the dependants
   C. To campaign for the spread of HIV
   D. To change behaviour

47. Which one of the following animal feeds is NOT a concentrate?
   A. Nappier grass
   B. Bone meal
   C. Fish meal
   D. Layers mash

48. Which of the animals below is CORRECTLY matched with its product?

<table>
<thead>
<tr>
<th><strong>Cattle</strong></th>
<th><strong>Goat</strong></th>
<th><strong>Sheep</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Milk</td>
<td>wool</td>
<td>milk</td>
</tr>
<tr>
<td>B. Beef</td>
<td>mutton</td>
<td>wool</td>
</tr>
<tr>
<td>C. Wool</td>
<td>milk</td>
<td>mutton</td>
</tr>
<tr>
<td>D. Skin</td>
<td>mutton</td>
<td>milk</td>
</tr>
</tbody>
</table>

49. Which one of the following parts of a plant helps to transport water to all other parts?
   A. Roots
   B. Leaves
   C. Stems
   D. Flowers

50. A beam balance is used to
   A. compare masses of objects
   B. measure weight of substances
   C. compare volume of different objects
   D. balance different objects
