STANDARD SEVEN MID TERM ONE EXAM 2018 SCIENCE

male reproduction organ is known as A. sperm duct B. penis C. urethra D. testes C. Excess medicine that remain should be A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation B. Abdom C. Dehyd D. Blood T. The type removed land is kn A. sheet of B. gulley C. splash D. rill ero S. Which on grouped? A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation D. Bear	ration in the stool of soil erosion in which a uniform layer is and deposited on the !ower part of a slopy	
A. sperm duct B. penis C. urethra D. testes C. Excess medicine that remain should be A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease C. splash D. given to fellowing statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation C. Dehyd D. Blood T. The type removed land is kn A. sheet e B. gulley C. splash D. rill ero Servation C. Shark D. Bear	ration in the stool of soil erosion in which a uniform layer is and deposited on the !ower part of a slopy	
B. penis C. urethra D. testes 7. The type removed land is kn A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. Clear water is recommended for proper observation D. Blood 7. The type removed land is kn A. sheet e B. gulley C. splash D. rill ero S. Which on grouped? A. Hawk B. Salama C. Shark D. Bear	in the stool of soil erosion in which a uniform layer is and deposited on the !ower part of a slopy	
C. urethra D. testes 7. The type removed land is kn A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation C. The type removed land is kn A. sheet of B. gulley C. splash D. rill ero Structure A. Which on grouped? A. Hawk B. Salama C. Shark D. Bear	of soil erosion in which a uniform layer is and deposited on the !ower part of a slopy	
D. testes 2. Excess medicine that remain should be A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. Clear water is recommended for proper observation The type removed land is kn A. sheet of B. gulley C. splash D. rill ero Structure of C. splash D. rill ero Structure of C. Shark D. Bear	and deposited on the !ower part of a slopy	
2. Excess medicine that remain should be A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. Clear water is recommended for proper Observation A. sheet each and is known. A. sheet each and is known. B. gulley C. splash D. rill erown. Warm A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper Observation D. Bear		
A. shared with other people B. thrown into a pit latrine C. kept for later use D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. Clear water is recommended for proper Observation A. sheet 6 B. gulley C. splash D. rill ero Servation A. Hawk B. Salama C. Clear water is recommended for proper Observation D. Bear		
B. thrown into a pit latrine C. kept for later use C. splash D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top D. rill eros S. Which on grouped? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper Observation D. Bear	land is known as	
C. kept for later use D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. splash D. rill ero Which on grouped? A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation C. splash D. rill ero B. Which on grouped? C. Shark D. Bear	erosion	
D. given to people suffering from the same disease 3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top B. A plastic bottle should be the best C. Clear water is recommended for proper observation D. rill ero. Which on grouped? A. Hawk B. A plastic bottle should be the best C. Shark D. Bear	erosion	
3. Which of the following statements is CORRECT about an air thermometer? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation S. Which on grouped? Warm A. Hawk B. Salama C. Shark D. Bear	erosion	
about an air thermometer? A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation D. Bear	sion	
A. The scale should be labelled from the bottom to top A. Hawk B. A plastic bottle should be the best C. Clear water is recommended for proper observation D. Bear	Which one of the animals below are CORRECTLY	
top A. Hawk B. A plastic bottle should be the best B. Salama C. Clear water is recommended for proper C. Shark observation D. Bear	grouped?	
B. A plastic bottle should be the best C. Clear water is recommended for proper observation B. Salama C. Shark D. Bear	blooded Scales on the body	
C. Clear water is recommended for proper C. Shark observation D. Bear	Toad	
observation D. Bear	ander Whale	
D. Bear	Dolphin	
	Trout	
D. When it is hot, the level of water in the straw 9. All the fol	All the following are sources of light EXCEPT	
goes down A. stars		
4. Which list consists of the parts of a flower that make B. fireflies		
up the pistil? C. moon	C. moon	
A. Ovules, stigma, style, ovary D. candle	S	
B. Filament, anthers, pollen grains 10. Which on	Which one of the following methods of food	
C. Corolla, sepals, anthers preservati	preservation is both traditional and modern?	
D. Stigma, ovary, sepals, filament A. Cannin	A. Canning	
5. Std 6 pupils placed bean seeds in wet cotton wool B. Low te	B. Low temperature	
and then kept in a refrigerator for three days. Which C. Use of	C. Use of ash	
condition for germination were they investigating? D. Freezin	D. Freezing	
A. Water 11. Which one	Which one of the following materials can be grouped	
B. Warmth together w	ith skylights?	
C. Oxygen A. A mirro		
D. Sunlight B. Spectac	Nog	
6. Which one of the following is NOT a sign and C. Frosted	ies	

D. Dirty water

symptom of cholera?

- 12. The force that pulls objects towards the earth is known as
 - A. gravity
 - B. inertia
 - C. pressure
 - D. mass
- 13. The diagram below represents the female reproductive system

- Which statement is **CORRECT** about the labelled administration and imparts and imparts and imparts?
- A. P allows the baby to grow
- B. R allows fusion of male and female sex cells
- C. Q receives the male sex cells
- D. S produces the female sex cells
- 14. The following are signs of a certain disease;
 - (i) Body weakness
 - (ii) Coughing of blood at times
 - (iii) Prolonged coughs
 - (iv) Chest pains
 - (v) Fever

The disease can be prevented by

- A. Drinking boiled water
- B. Living in well ventilated rooms
- C. Draining stagnant water
- D. Covering the holes of pit latrine
- 15. Which one of the following is NOT needed when modelling the sky?
 - A. Cotton wool
 - B. Coloured pencils
 - C. Pins
- sci 148 01//17

- D. Foil paper
- 16. The diagram below shows an experiment done to investigate a certain component of soil.

The component being investigated is

- A. minerals
- B. air
- C. humus
- D. water
- 17. Which one of the following animals feeds is a type of stored dry fodder?
 - A. Silage
 - B. Hav
 - C. Desmodium
 - D. Star grass
- 18. In which stage of HIV infection does the victim show no signs but any medical test reveals the presence of the virus in the blood?
 - A. Incubation
 - B. Full blown
 - C. Symptomatic
 - D. Window
- 19. Which one of the following is green non flowering?
 - A. Mushroom
 - B. Penicillin
 - C. Algae
 - D. Sorghum
- **20.** A raingauge is dug about 15cm into the ground

MAINLY to

A. make it firm

Metallic B. reduce evaporation of the collected water bottle top Basin with C. prevent water from splashing into the funnel water D. make it withstand harsh outdoor conditions Crushed bottle. 21. Which one of the following lists consists of animals The factor that was being demonstrated is with a backbone? A. size 9000-2696 A. Cobra, tortoise, millipede B. material B. Earthworm, weevil, beetle C. weight ador apilal kampaih C. Hippo, butterfly, chameleon D. shape D. Gecko, owl, bat 27. All the following are good conductors of heat 22. The type of soil which has the highest capillarity EXCEPT A. feels rough between the fingers A. iron B. cracks when dry B. copper C. also has large airspaces C. wood D. does not hold together when wet D. aluminium A certain animal has the following characteristics; Which pair consists of both energy-giving foods? 23. 28. A. Wheat and groundnuts - lay eggs -cold-blooded B. Sunflower and lettuce - body covered with dry scales C. Fish and milk - breathes through lungs D. Rice and peas The animal is likely to be 24. Which one of the following is **NOT** a deficiency the following occaigns of a cust disease? A. a toad A. Kwashiorkor B. a crocodile C. a duck B. Malaria (III) Prolonged congles C. Anaemia D. a shark D. Rickets 29. Food mixes with gastric juice in the 10) France 25. Which one of the following is the last step when A. stomach The discussions by provented by setting up an experiment to demonstrate conduction B. mouth mitniW C Drinking boiled water of heat in solids? C. ileum B. Living in well ventilated rooms munaboub. C 0.1 A. Fixing the pins onto the candle wax B. Heating one end of the metal strip 30. The illustration below shows changes of state of D. Covering the holes of bit latrine C. Fixing the metal strip onto the support matter Water D. Fixing candle wax onto the metal strip modelling the sky The diagram below shows an experiment done to 26. Vapour A. Cottob wood demonstrate a certain factor that affects floating and Water lione & Demolo 3. 81 DIVIZITENZA sinking:

oonii aikololaa Ta

Which pair of the process labelled WXY and Z represents melting and condensation respectively?

- A: X and Z
- B. W and Y
- C. Z and X
- D. Y and X
- 31. The substances contained in foods that help to maintain the good health of the body are known as
 - A. nutrients
 - B. food
 - C. meal
 - D. nutrition
- 32. Which statement about sound is TRUE?
 - A. The extent of loudness or softness of a sound is called pitch
 - B. The shape of the ears of most animals help to amplify sound.
 - C. Noise makes people alert
 - D. A choir singing loudly will cause noise pollution
- 33. Which one of the following aspects is common to both steam and flour?
 - A. Definite shape
 - B. Definite volume
 - C. No deffinite shape
 - D. Definite mass
- 34. An example of a recreational use of water is
 - A. rearing fish in ponds
 - B. bathing
 - C. surfing
 - D. making fountains
- 35. All the following are likely to take place when heat is reduced on different states of matter EXCEPT
 - A. reducing in size
 - B. condensing
 - C. freezing

- D. melting
- 36. Which one of the following is NOT a way in which different animals protect themselves from danger?
 - A. Flying off
 - B. Biting
 - C. Hiding in shells
 - D. Sucking blood
- 37. Which one of the following changes in adolescence occurs in both boys and girls?
 - A. Increase in height and weight
 - B. Growth of breasts
 - C. Wet dreams
 - D. Broadening of hips
- 38. The pie chart below represents the composition of air.

The gas which is used to put out accidental fires is named

- A. L
- B. K
- C. M
- D. J
- **39.** Which one of the following aspects of light results to formation of the rainbow?
 - A. Dispersion
 - B. Reflection
 - C. Refraction
 - D. Moving in a straight line
- 40. When modelling the solar system
 - A. the balls to represent the planets should be of the same size

B. two balls can be placed on one circle C. the name tags of the planets and the sun are fixed last D. the model of the sun is fixed on the last circle Which part of the flower becomes the fruit after fertilisation? A. Petal B. Ovary C. Ovules D. Anthers Which one of the following practices will help it make water safe for drinking? A. Filtering B. Storing in a clean container C. Mixing it with soap D. Boiling Which one of the following is **NOT** a requirement for good health? A. Medicines B. Food C. Exercises D. Sleep A snail moves by A. walking B. crawling C. sliding D. slithering

Which one of the following plants has separate male

and female flowers on separate plants?

41.

43.

45.

A. Maize

C. Milllet

D. Pawpaw

B. Sugarcane

- **46.** Which one of the following is **NOT** an importance of HIV testing?
 - A. To make a decision on marriage
 - B. To plan for future of the dependants
 - C. To campaign for the spread of HIV
 - D. To change behaviour
- 47. Which one of the following animal feeds is **NOT** a concentrate?
 - A. Nappier grass
 - B. Bone meal
 - C. Fish meal
 - D. Layers mash
- **48.** Which of the animals below is **CORRECTLY** matched with its product?

<u>Cattle</u>	<u>Goat</u>	Sheep
A. Milk	wool	milk
B. Beef	mutton	wool
C. Wool	milk .	mutton
D. Skin	mutton	milk

- **49.** Which one of the following parts of a plant helps to transport water to all other parts?
 - A. Roots
 - B. Leaves
 - C. Stems
 - D. Flowers
- 50. A beam balance is used to
 - A. compare masses of objects
 - B. measure weight of substances
 - C. compare volume of different objects
 - D. balance different objects
