

24.2 PAPER 2 (450/2)

This paper was composed of ten compulsory questions and equally weighed exercises. Candidates were allowed to spend 15 minutes at each station and were not allowed to either review the previous stations work or read instructions for the other stations. The performance was slightly lower from a mean of 27.61 in year 2003 to 26.09 in year 2004. However, poor performance was noted particularly in questions 2, 5, and 8.

Question 2

INSTRUCTIONS:

Using the materials, tools and equipment provided, make the aircraft corner support bracket shown in the figure below: (10 marks)

Candidates were required to fabricate an aircraft corner support bracket.
