

Question 11

Figure 9 shows parts of a pulley and bracket drawn in first angle projection. Assemble the parts and draw FULL SIZE the following views in first angle projection:

- a sectional front elevation along the cutting plan A-A
- an end elevation.

Insert **six** leading dimensions.

Unspecified dimensions are left to the candidates discretion. Hidden details are not required.

Candidates were required to figure out how the parts shown in the question fit each other to complete the assembly. The responses were to be presented in form of sectional front elevation and an end elevation of the assembly.
