

(b) Dimension the radii, sector and diameter given in figure 3.

(2 marks)

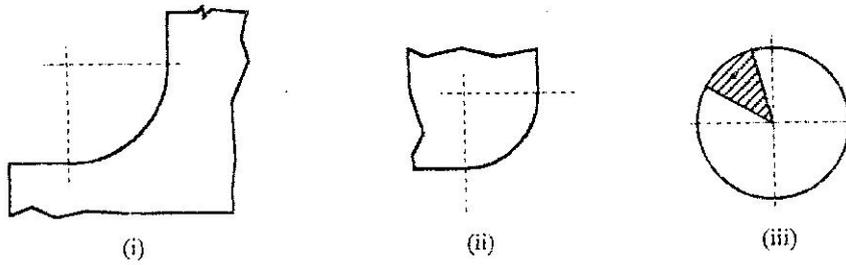

Figure 3

Candidates were required to construct a plain scale for certain specification and also show how the radii and sector are dimensioned for the figures given in part (b).

### Weaknesses

Although part (a) was generally well attempted, some candidates did not follow the procedure for constructing such a scale. In part (b) many candidates did not observe dimensioning rules for circles and arcs.

### Expected Responses
